### **Certificate of Electrical Appliance Testing**

Tested in accordance with The Institute of Electrical Engineers (IEE)

This is to certify that the following electrical items, cables and connectors have been tested for electrical safety and have satisfied the requirements of the tests to comply with the H.S.E. Electricity at Work Regulations 1989

<b>Work carried out for:</b> Chris Green <a href="#">CG Events</a>	<b>Date:</b> 25th July 2017
--	-----------------------------

Item Number	Item	Date Tested	Next Test	Fuse	Visual Check / Combined Test	Pass/Fail

All items listed on Page 2

Visual Check includes mechanical checks, but no electrical test is carried out. Combined Test also includes earth continuity, insulation and earth leakage tests. All equipment and cables should be tested regularly, every 6 to 12 months depending on usage or after any fault or damage has arisen.
